Professional Summary

IT professional with hands-on experience in help desk and technical services, specializing in troubleshooting, system administration, and cloud technologies. Skilled in supporting enterprise environments, managing Active Directory, and implementing solutions in Azure. Possesses foundational software development knowledge and practical experience with automation using PowerShell scripting to streamline processes and improve efficiency. Experienced in mentoring colleagues, and creating documentation, with a proven ability to manage priorities, foster collaboration, and drive successful outcomes.

Technical Skills

- Operating Systems: Windows 10/11
- Networking: TCP/IP, VPN (Forticlient)
- Cloud: Microsoft Azure
- Tools: Active Directory, MFA, PowerShell, ServiceNow, Footprints, Easy Vista
- Development: HTML, CSS, JavaScript, Python, React, Mongo DB
- Remote Access: TeamViewer, Quick Assist, Dameware, EV Reach
- MDM: MobileIron, Intune
- Applications: Microsoft Office 365

Certifications

- Information Technology Program Certificate - Course Careers, 2022
- Windows 10 for IT Support: Troubleshooting Basics - LinkedIn Learning, 2022

Projects

- Zone Coffee Email Template: <https://zone-coffee-email-template.vercel.app>
Github : https://github.com/Jamesjgrizz/Zone_Coffee-Email-Template/

Created a responsive promotional email template using MJML, HTML, and CSS, focusing on clean table-based email structure, reusable sections, mobile-friendly layouts, and email-client compatibility while designing a polished marketing layout suitable for e-commerce campaigns.

- Zone Coffee – Shopify store: <https://zone-coffee-2.myshopify.com/>
Developed a fully responsive e-commerce coffee store using Shopify, customizing storefront layouts and branding to create a modern shopping experience while optimizing product organization, navigation flow, and mobile responsiveness to improve usability and customer engagement.
- Pangea Project: <https://pangea-pantry.vercel.app/>
Github : <https://github.com/Jamesjgrizz/Pangea-Pantry>
Developed a responsive recipe and food discovery website using HTML5 and CSS3, implementing responsive design through CSS media queries to ensure cross-device compatibility across desktop, tablet, and mobile screens while also utilizing semantic HTML and SEO best practices to improve accessibility, site structure, and search engine visibility
- Dad Joke Machine: <https://dad-joke-machine-e6qw.vercel.app/>
Github : <https://github.com/Jamesjgrizz/Dad-Joke-Machine>
Built an interactive joke generator web application using HTML5, CSS3, and JavaScript, integrating a third-party Dad Joke API to dynamically fetch and display random jokes while utilizing asynchronous API requests, DOM manipulation, and responsive front-end design principles to create an engaging and user-friendly experience
- SOC Analyst – Azure Honeypot
Github: <https://github.com/Jamesjgrizz/Soc-HoneyPot>
Implemented a Security Operations Center (SOC) and Honeynet environment in Microsoft Azure to enhance threat detection and monitoring capabilities. Designed and deployed cloud-based security infrastructure with practical application highlighted in

🔗 OsTicket – Help Desk Ticketing System

Implemented a help desk ticketing system (OsTicket) using Azure Virtual Machines to streamline IT support operations. Designed and deployed a cloud-based environment for managing service requests, with full project documentation available on GitHub: <https://github.com/Jamesjgrizz/osticket-prereqs>

Professional Experience

Service Center Analyst | Merakey | 11/2022 - Present

- Provide IT support for end users via phone, ticketing systems (Footprints, EasyVista), and email
- Mentored new IT analysts by providing guidance, sharing best practices, and supporting their onboarding process.
- Created technical documentation with step-by-step instructions to standardize and streamline routine IT tasks
- Utilize remote access tools (TeamViewer, Quick Assist, Dameware, EV Reach) for troubleshooting
- Collaborate with Tier II, NetOps, Telecommunications and SysOps teams for escalated issues
- Manage Mobile Device Management (MobileIron and Intune) and troubleshoot iOS/Android devices
- Perform Windows 10/11 troubleshooting, VPN configuration (Forticlient), and Office 365 support
- Handle Active Directory tasks, MFA setup, and TCP/IP troubleshooting
- Assist with Azure-related tasks and computer imaging
- Stage replacement computers before deployment
- Performed hardware upgrades and maintenance, including RAM installation, storage expansion, and peripheral setup.
- Utilized PowerShell scripting to automate routine help desk tasks, including restarting services (e.g., print spooler), installing applications, creating and managing folders, extracting and analyzing Event Viewer logs, outputting diagnostic files, and clearing cache/cookies to improve workstation performance.

Additional Experience

- Caretaker | All American HealthCare | 05/2023 - Present
- Medical Courier | Capstone Logistics | 09/2021 - 04/2023
- Union Carpenter | Local 164 | 07/2017 - 09/2022
- Maintenance Technician | Intersolutions | 05/2017 - 04/2021
- Direct Support Professional | NHS/TAIG (Merakey) | 07/2012 - 06/2017

Education

- Cyber Security Analyst - Leveld Careers, 2023
- Information Technology Course - Course Careers, 2022
- Carpenters Apprenticeship Training - Joint Apprenticeship Training Center, 2021
- Building Maintenance – Orleans Technical Institute, 2011
- High School Diploma - Philip A. Randolph High, 2010
